Sir amr grade sheet e math er grade show korche na 😊 ki korbo ??

Add class comment...

➤

Sakal Roy

Jan 20 (Edited Jan 20)

I've 3 very important things to address:

- 1) MID TERM ASSIGNMENT:
AS I MENTIONED IN CLASS AND ANNOUNCED IN GOOGLE CLASS ROOM: MID TERM ASSIGNMENT was supposed to be submitted in the **provided google form link** in the **mid term assignment document** and certainly not in email.
Unless submitted in google form duly, it won't be counted and GRADED AS 0 even if you email me as I've instructed not to do so and replied most of those who submitted in email to submit in google form to get marks.
- 2) QUIZ:(DEBATE+SELF-ASSESSMENTS & HOMETASKS+ QUIZ COMPETITION):

All are counted as quiz. Either I need to have your hardcopy or you need to submit those in email as instructed.

P:S: In case any one of you missed QUIZ COMPETITION AND DIDN'T FOLLOW MAKE UP INSTRUCTIONS comsisting BOTH STEP-1 and STEP-2 as instructed you won't get full marks there. You will receive partial marks if only STEP-1 is done and will receive "0" if none of the steps are done.

Now, See the following list. I'm checking each and every of them, it may take time.

If you've missed one, just email me with that mentioning "MISSED SELF ASSESSMENT" and explain your reason in one line why did you miss it.

That'll do. QUIZ

Mathematical Debate SELF-ASSESSMENT

5 Questions on Differential Calculus (Mid-Term Topics) SELF-ASSESSMENT

Implicit & Explicit Equation and Function SELF-ASSESSMENT

Derivative Recap + BODMAS SELF-ASSESSMENT

How We See? + How We Use Multivariable / Multivariate Functions? QUIZ COMPETITION + HOMETASK

Multivariable Functions: Calculation & Visualization

3) MID AND FINAL:
ALL PARTIAL BREAKDOWN INPUTTED, YOU'LL GET DETAILED RESULT ANALYSIS AS PROMISED. ALSO, WILL SHARE FINAL GRADESHEET BEFORE SUBMITTING.
I TRIED TO ENSURE THAT NO ONE OF YOU RECEIVE LESS THAN YOU DESERVE.
MY SUGGESTION WILL BE: FOCUS ON 100% UNDERSTANDING & ACCURACY in FUTURE COURSE & LIFE.
BEST WISHES.
~SKY.

SOLUTION AND MARKING SCHEMES FOR BOTH MID TERM AND FINAL.
MID TERM:
<https://drive.google.com/file/d/1RWWHzJrxfehmbXM78K6LjpP8XPS5kuBq/view>

FINAL:
(will add soon)

I'M STILL FINALIZING EVERYTHING, SO MIGHT TAKE TIME WHILE CHECKING SCRIPT AND DISCUSSING WITH EVERYONE. PLEASE WAIT ACCORDINGLY. I WISH THAT NOONE GETS LESS THAN HE/SHE DESERVES. BEST WISHES.

I've decided:

- No marks will be deducted from MID TERM ASSIGNMENT for submitting in the LATE SUBMISSION PERIOD: 3 days from announced Deadline

But, remember there are other Self-Assessment tasks and Hometasks announced in the group communication Medium (Google Classroom). So, in case you've not submitted those, Scroll down in GOOGLE CLASSROOM and DO SUBMIT IN TIME. BEST WISHES.

Dear all,
I'm on the way to BRACU.
If anyone is already there for consultation, please wait.
I will reach around 12:00 pm.
Extending consultation hour upto 6:00 pm since I'm starting late.

Sorry for the inconvenience.

#Also, if anyone wants to connect in online, that's fine.
But students coming for in person consultation will get priority.
Joining link for consultation:

--> Join BdREN Zoom Meeting from Laptop or Mobile:

Hello, everyone.
Due to unavoidable peronal reason, I'll start todays make up session at 9:30 pm. (insteae of 7:00 pm)
The session will be recorded and resources will be given as soon as the sessions ends, so in case anyone misses it can watch it again in your convenient time.
Thanks in advance for understanding and sorry for the inconveniences.

Those who missed QUIZ COMPETITION on DEC 18, do the following:
STEP-1: Email me the reason of your absence and solution of the given 4 questions and tasks on QUIZ COMPETITION
(see the announcement here:
<https://classroom.google.com/c/ODE1Nzk4MTM0NjA5/p/ODM2OTQxNjc0NTU0/details>

STEP-2: After completing **STEP-1** properly, MEET ME in ANY OF MY OFFICIAL CONSULTATION HOUR at my consultation place and give a MAKEUP QUIZ on first 3 similar questions (Task-4 will not be needed to solve again in MAKE QUIZ)

Unless you're completing both STEP-1 and STEP-2 your QUIZ COMPETITION MARKS will not be counted.
Take care. Best wishes.

Announcement:
1) No offline/online class on tomorrow 20 february,2025.
2) Online Make up sessions will be announced afterwards.
3) Prepare using the attached resource.

MSG from Registrar:

Dear All,

The following academic arrangements have been taken for the welfare of our university community considering the recent developments in the country.

Il classes on Friday, December 19, 2025 will be held online. All Schools, Departments and Institutes are asked to have further coordination in this regard.

No classes will be held tomorrow, December 20, 2025 in solidarity with the national mourning day as announced by the government. All Schools, Departments and Institutes are asked to prepare make up arrangements as needed.

This is applicable to all students of undergraduate and postgraduate programs. RS management will advise RS students regarding specific arrangements.

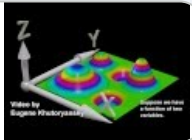

The University is closely monitoring the situation and further announcements will be made as needed.

Please do take care.

Dec 18, 2025

Dear All,

Quiz competition will start 15 minutes after the scheduled time of class.

This 15 minutes is for you to prepare well and revise the basic ideas regarding basic mathematical concepts, mmultivariable functions and their visualizations.

GET READY!

Add comment

Sakal Roy

Dec 13, 2025

HOMETASK & QUIZ:

NEXT THURSDAY, DEC 18, 2025 YOU'LL HAVE A QUIZ.

AND THIS QUIZ WILL NOT BE JUST A PEN-PAPER TEST.

RATHER, IT'LL BE MORE LIKE AN ACTUAL ENJOYABLE “QUIZ COMPETITION”.

SINCE, THERE IS NO SCOPE FOR MAKEUP QUIZ, SO DON'T MISS IT UNLESS YOU'VE VALID DOCUMENTS IN CASE OF EMERGENCY.

• ***WHAT ARE YOU SUPPOSED TO DO?***

⇒ EXPLORE THE FOLLOWING RESOURCES LIKE SHERLOCK HOLMES!!

• ***HOW WILL YOU DO THAT?***

⇒ FOR EXAMPLE, DID YOU NOTICE THAT: IN THE MISSION IMPOSSIBLE CLIP THERE'S A 8 DIGIT PASSCODE SHOWN? JUST KIDDING, IT'II NOT BE MCQ BASED ON MEMORIZATION. BUT STILL, IF YOU'VE NOTICED THE PASSCODE, THEN COMMENT HERE TO PROVE THAT YOU'VE ACTUALLY PAID ATTENTION.

• ***WHY DO YOU NEED TO DO ALL THESE?***

⇒ WITHOUT RELATING TO PROPER VISUALIZATION AND ATTENTION TO DETAILS, IT MIGHT FEEL VERY DIFFICULT TO GRASP EVEN BEAUTIFUL AND EASY IDEAS.

TAKE CARE. ALL THE BEST. SEE YOU ALL ON THURSDAY IN QUIZ COMPETITION.

Dec 13, 2025 (Edited Dec 13, 2025)

As usual Todays Self-Assessment will be the last announced hometask.

Take a paper, write full name, ID, section and submit answering the following.

And those who'll miss the class have to email me with this assignment explaining cause of absense.

Total time 20 minutes (if you need more time, keep writting, class discussion will start after that).

Dec 11, 2025

Dear all,

I'll start todays class 15minutes after the scheduled time.

In this 15 minutes do the following:

Take a paper, write name, ID and solve the problems in detail here:

1) Find the derivative of x^x with respect to x

2) What is the value of $8\div2(1+1)$, explain your reasoning and show steps.

Since, this is a self-assessment test so you all must complete this and submit to me in paper or if you miss the class then send in email.

We'll have these self-assessment tests frequently to recheck what we've learned. Hope that helps. Best wishes.

Dec 10, 2025 (Edited Dec 10, 2025)

MSG FROM COURSE COORDINATOR:

Dear Colleagues,

We are going to cover the following syllabus for the final exam of Fall 2025.

Syllabus for Final Exam:

- Partial derivatives
- Chain rules for partial derivatives
- Maxima and Minima of functions of two variables
- Lagrange Multipliers to find maximum and minimum values
- Taylor expansion (Linear and Quadratic) of functions of two variables
- Conic sections (Parabola, ellipse and hyperbola)
- Conversion of points (Rectangular, Cylindrical and Spherical Coordinates)

Suggested problems from the Calculus book [Anton's 10th Ed.]

- 13.3 Partial Derivatives 37-45 +Practice Sheet attached:
<https://drive.google.com/file/d/1nU2rOmvm6aPQunqaAyBrKr0EkgtkGOoi/view>
- 13.5 Chain rule for partial derivatives 1-6,17-22
- 13.8 Maxima and Minima of Functions of two variables 9-19
- Taylor Expansion of two variable Functions
Practice Sheet attached:
https://drive.google.com/file/d/1oznPiV-dej_vYZyzgVeADqechjpfcMhh/view
- 13.9 Lagrange Multipliers 5-12
- 11.8 Cylindrical and Spherical Coordinates 1-12
- 10.4 Conic sections 3 - 14 [Question pattern: Find all the characteristics of (parabola, ellipse,hyperbola)]

Regards,

Sanjeeda Nazneen

Dec 6, 2025 (Edited Dec 6, 2025)

Dear all,

I'll start todays class 15minutes after the scheduled time.

In this 15 minutes you've solve a very easy problem.

Rewrite the equation:

$\cos y-x * e^y=0$

into both $y=f(x)$ and $x=g(y)$ form.

Take a paper, write name, ID and solve the problem there.

Since, this is a self-assessment test so you all must complete this and submit to me in paper or if you miss the class then send in email.

We'll have these self-assessment tests frequently to recheck what we've learned. Hope that helps. Best wishes.

Dear students,
Hope you are all fine.
#Stay safe. Take care of your physical and mental health.
Reach to me incase of any emergency.
#Check exam date, time, exam room, topics carefully
#In case, you have any kind of medical or other sort of emergency, contact me immediately.
If you miss the mid term exam, then you can sit for makeup mid exam following bracu rules afterwards. But if you attend the exam without informing me the emergency or urgency then no MAKE UP MID will be possible as per BRACU rule.
So, take care, sleep well and stay connected.
Best wishes.

Sakal Roy • Nov 22, 2025

After getting the critical points from first derivative = 0 or not differentiable, you have two ways to get maxima-minima.
1) Calculating open interval where the function is Increasing/decreasing, concave up/concave down and then decide graphically
2) By doing second derivative test at critical points where second derivative positive means minima and second derivative negative means maxima.
Both ways are mathematically valid and its your choice to decide extrema.

Hope you're all safe and sound.
5.7 M_L(Richter Scale) Earthquake is huge for dhaka. Some prediction says, there might be more in coming days.
Official site:
<https://mobile.bmd.gov.bd/bmdmobile/earthquake/>

Here, It shows 5.5 mww though. Here, 'mww' is a subtype of 'moment magnitude scale' (not the richter scale) which refers to "Mww – Derived from a centroid moment tensor inversion of the W-phase." as per wikipedia.

Stay safe. Take care.

Dear All,
We'll start 15 minutes after the scheduled time.
This 15 minutes you have a task to do on your own. I'll collect all of your answers in papers and then I'll start the class.
Those who can't join in person lecture, write here in comments:

Take pen/pencil and paper, write your name and ID.
Questions:
Write in brief about how confident you feel about differential calculus by answering these 5 questions:
1) Do you know what continuous means?
2) Do you know what differentiability means?
3) Do you know what critical point means?
4) Do you know what'll be the slope of a straight line connecting two point A(x1,y1) and B(x2, y2)?
5) Do you know what y'(a), y''(a), y'''(a) means?

If all of your answers are YES then you are ready to solve any problem in todays all topics. Just we need to know WHAT? HOW? WHY? of these topics. BEST WISHES.

Quick Response to some queries regarding limit.

Attaching a short and quick response here for 3 questions regarding LIMIT, CONTIUIITY. Its auto generated by CHATGPT as rapid response.
****If you've attended lectures or watched recording, studied given resources here in classroom, then you probably won't need this. Yet, take a look to find if CHATGPT has made any slight mistakes.**

<https://chatgpt.com/canvas/shared/691cc103258c8191b0cd3e4e246cd581>

Also,you can also see the same thing in detail from me in recorded class lectures and given pdf of lectures and study material given in google classroom or in google doc.

Also, you can see the FAQ from past semesters here just to know answers of some common queries:

****Ignore all dates and other announcements from here to avoid confusion.**

ATTENTION: MSG from BRACU REGISTRAR. PREPARE ACCORDINGLY.
=====

Dear Students

The following measures have been taken for the welfare of our university community-
Classes will be conducted online on 12 November and 13 November 2025.The Mid-term examination week will be starting from 22 November instead of 15 November. The detailed examination schedule will be published on the BRAC University website accordingly. In the meantime, classes will be conducted in the period from 15 - 21 November as per the regular schedule.Considering the safety of the students, transport service will remain suspended until further notice.

RS management will advise RS students regarding specific arrangements.

The university is closely monitoring the situation and further announcements will be made as needed.

Please do take care.

Nov 11, 2025

Dear All,
I think you all are aware of the current national situaion and official mail regarding temporary suspension of BRACU buses.

- BRACU has requested the faculties to consider attendance,quiz, assignment during these turbulent times.
- However, no direct msg for conducting online classes have been given.
- So, I need to be in BRACU. But, don't worry. If needed I'll conduct online sessions and announce here in classroom. Will also provide video resources and lecture drawing board as usual for convenience.
- And apart from scheduled sesion, I'll take multiple extra online session

as necessary both for problem solving and exam strategy and recording and resources will be shared.

- So, in case you feel/sense any risk coming to BRACU, no need to come to university only for my lectures. Its 2025, we can share, discuss and clear our query and confusions online.

Your safety is my first concern. keep an eye on google classroom (here). I'll annouce all details in time. Take care.

Regards
Sakal Roy

@yaseen mainul yash:
hope you and your family is in good health now. Do the following:
Email me mentioning full name, ID, reason of absence, supporting document(if any).
And try to attend next ones, Will look into this matter. But as course outline nentioned there is no scope for make up quiz we've figure out some other way of assessment. Don't worry.
prepare with a strong basic in mathematics, everything will be fine. Take care.

Take care. stay safe. no need to hurry to go back to class anymore untill everything is safe. Sharing lecture plan here.
I'll share all resources here. will take make up class later to cover todays material.

Remember, the last classes question?
"If x is a real number and $x = 0.999....$
then which of the following is ALWAYS TRUE:
(a) $x < 1$ (b) $x = 1$ (c) $x > 1$ "

The first 10 minutes of class is dedicated for arranging your thoughts and discuss with everyone. I'll join you after 10 minutes and will ask to explain your reasoning.

Think and get ready!

People

Dear esteemed colleagues,
Hope this email finds you well. For your convenience, I have attached the course outline.

The mark distribution for MAT 110:
Attendance = 5%
Assignment = 15%
Quiz = 20%
Midterm = 20%
Final = 40%
Total = 100%

Drive link for reference books:
https://drive.google.com/drive/folders/1R6Od2MYszWQITh46efku2Rc_K6iuxG_D?usp=drive_link

Drive link for practice problems:
https://drive.google.com/drive/folders/1dHL4TyqNYR22brwj9XyDzFvGikkXbgvI?usp=drive_link

We are going to cover the following syllabus for the midterm:

- Limits, L' Hopital's rule, The Squeeze Theorem, Horizontal and Vertical asymptotes and Continuity
- Differentiability and Techniques of Differentiation
- Successive Differentiation
- Maxima and Minima, Roll's and Mean value theorem
- Taylor and Maclaurin polynomials and Series for single variable functions

If you have any questions or queries, please inbox me.

Hello everyone,
The "Mathematical Debate" will officially start 15 minutes after the scheduled class time.
During the debate you can't use any online or offline resources.
So, in this 15 minutes you can take a paper and note down any important info from previous classes or the given resources
You can keep this paper and use it during the debate. (You can start noting down now also.)
See you on the starting time of "Mathematical debate" (15 minutes after the scheduled class starting time).
Best wishes.

- REMINDER ON QUIZ/ASSIGNMENT:
- We'll have a "MATHEMATICAL DEBATE" on THURSDAY 30 OCTOBER.
- As I mentioned in last 2 classes the debate will include elementary topics. Detailed instruction for the "MATHEMATICAL DEBATE" will also be published here for your preparation.
- You'll experience WHAT the word "QUIZ" usually means and HOW it can be FUN. Also, WHY instead of lots of pen-paper quiz a few such engagement are enough to aassist you in learning. Assisting you in learning is the first and foremost purpose of any assessment, not just marks. Hope you'll enjoy it. :D

Since, there is no scope for any makeup quiz usually in this course, so don't miss the classes or quizzes unless its an emergency.

NOW I'm SHARING A IMAGE as an EXAMPLE. FIND OUT HOW MANY THINGS ARE WRONG HERE and practicing DEBATING with clear cut LOGIC.
You'll find more some examples in the Course info in List of Common Misconceptions and fallacy. OR you can explore other resources if you wish for this debate.

$$\frac{d}{d5} \left(\sqrt{5} \right) = \frac{1}{2\sqrt{5}}$$

Everything is relative

Dear All,
Course Coordinator or Course Outline for this semester FALL 2025 has not yet been announcedd officially by MNS, BRACU.
I showed you all the previous semester SUMMER 2024 earlier and requested to go through them. However, in this classroom I didn't want to share that again to avoid confusion, waited for BRACU to announce the new semester one as the first post.
However, due to deparmental delay of finalizing all these I'm sharing the previous one that I showed you all here for convenience. I'll share updated one as soon as MNS announced officially.

MAT110_SUMMER_2025_SKY
To share this document to anyone- USE the following link:
<https://rb.gy/jgt3q6>
or https://docs.google.com/document/d/1f8rNUeZVpRqr5wGd8j3p3Vsv6Y4_idHHVvasZ2_DClo/

Most topics for MID TERM are supposed to be same as last semester.

- I'll first focus on discussing the topics: LIMIT, CONTINUITY, DIFFERENTIABILITY which involves limit.
- The rest of the topics for MID TERM doesn't usually involve solving limit so they're easier to grasp.
- I'll discuss Leibnitz Theorem at the last, because sometimes that topic isn't incuded in the MID TERM topics by MNS for some semester. That way I think we can utilize mo of our time and go for in depth discussion in crucial topics.

QUIZ/ASSIGNMENT:

- We'll have a "MATHEMATICAL DEBATE" on THURSDAY 30 OCTOBER.
- As I mentioned in last 2 classes the debate will include elementary topics. Detailed instruction for the "MATHEMATICAL DEBATE" will also be published here for your preparation.
- You'll experience WHAT the word "QUIZ" usually means and HOW it can be FUN. Also, WHY instead of lots of pen-paper quiz a few such engagement are enough to aassist you in learning. Assisting you in learning is the first and foremost purpose of any assessment, not just marks. Hope you'll enjoy it. :D
- Since, there is no scope for any makeup quiz usually in this course, so don't miss the classes or quizzes unless its an emergency.

In this short semester, I wish not to burden you all with heavy loads frequently but rather train to take heavy cognitive load once or twice when its needed.

Take care. Best Wishes.
