@everyone
INVITATION TO A JOURNEY
ITS THE TIME OF THE YEAR AGAIN...
Hello Math lovers,
Probably you know that in **FALL 2024** I taught "**MAT 456: TOPICS IN COMBINATORICS**" at **MNS, BRACU** .This was a brand new elective course (**IF math major/minor THEN OK, ELSE please check with respective departments**) and was the first solely dedicated course on COMBINATORICS in BRACU. Now, I wish to teach the course again in next semester **FALL 2025** in **MNS, BRACU**.
ARE YOU READY? THEN SHOW YOUR WISH IN WISHLIST.

Here's just a tentative brief design of the course and detailed assessments from FALL 2024:
<https://shorturl.at/beim5>

That's just a brief, more to be unfolded. And, I believe in collaboration, so keeping this document open for any comment.
LET'S COMBINE OUR THOUGHTS...
<A fun poster is attached for **VIBE CHECK** of the course. Surely I don't look like this, so poster credit/blame goes HALF to AI and HALF to HAFIZ, my beloved brother in crime and colleague.>

Dear All,
First things first. Results has been submitted in CONNECT just as youu've seen in the shared GRADESHEET. Now, its been sent for approval of the head. Then after that Exam controller office will approve that and it'll be publised. So, it may take time since its in the adminisrative wing now.
Remember, that ONCE the grades are submitted there is only one option of changing it using "GRADE CHANGE FORM" by course faculty. The use of that is discouraged and ask for genuine reason. Any technical glitch, input error which can be proven and claimed can be genuine reason. But adjusting marks to get the next grade isn't labeled as genuine reason in academic terms. I hope you understand the scenario, you can get detail in BRACU official publicaions or in department office or in website regarding these emergency steps. Let, me know if you wish to go for official review also. In that case, another facuty apart from me will probably assess the scripts idepedently. Its my responsibility to provie you with all the options.

?

https://classroom.google.com/u/8/c/NzU0NDYzMdYwNzAw

1/17

And I'm not talking about grades only, because:

Also, based on the actual mark (not rounded one) I tried to ensure that most students can reach the next grade (considered maximum 1 marks bonus in such cases).

Yet, remember, that sometimes grades doesn't reflect your learning properly. So, be cautious enough so that you can show in exam script what you've learnt properly and be relaxed.

- But, don't think that I'm giving you free marks. Actually, I've 3 more assignments for you.**

2) *Be humble*

DEADLINE: ,

Oh, one more thing that I nearly forgot.

I owe you all a treat that I couldn't manage to arrange due to frequent online classes in this Semester.

Will try to meet and eat in upcoming semester if possible. Best wishes.

Dear All,

I haven't submitted your grades today.

since BRACU authority extends submission time unofficially to 1 june (due to 4 day closure at a stretch).

- 3):Also, you'll have time to check the total gradesheet for 1-2 hours before I officially submit it to BRACU CONNECT.

Hope this clarification helps

Best wishes.

May 23, 2025

Dear All,

Your MID TERM SCRIPT has been assessed using the attached marking scheme and detailed solution.

- I'm trying to do the same for FINAL Scripts. But proobably won't be able to provide detailed solution like MID TERM one you're seeing here due to time constraint.
- Will announce for MID and FINAL SCRIPT CHECKING whenevereverything is fiished.
- Here is the gist of the ASSESSMENT STRATEGY I follow. You'lll get this break down also while receiving MID and FINAL marks in individual email.

SOLUTION & MARKING SCHEME(Created by: SAKAL ROY [SKY])

TO APPRECIATE YOUR MATHEMATICAL THINKING, ANY VALID MATHEMATICAL WAY OF SOLVING WILL BE TREATED EQUALLY AND ASSESSED ACCORDINGLY, AS LONG AS IT'S CONSISTENT WITH THE PROVIDED INSTRUCTIONS OF THE QUESTION.

IN THIS ASSESSMENT PROCESS EVERY PROBLEM WILL BE ASSESSED BASED ON 3 CRITERIA:

A. MATHEMATICAL THINKING

B. MATHEMATICAL KNOWLEDGE

C. MATHEMATICAL SKILL

Hope that will help you understanding your performance even better and in a more sophisticated manner. Best wishes

Hello everyone.
Hope you are all well.

- I'll soon make an announcement regarding marks of MID, script checking date and assignment ,QUIZ marks first.
- Then afterwards FINAL marks and scripts checking the date of final scripts will be given.
- FINAL marks will take time to ensure that you all get what you deserve with appropriate marking scheme, solution and partial marking criteria.

Thanks in advance for your patience.
Best wishes.

Unknown

Add comment

Sakal RoyMay 18, 2025

Sakal Roy is inviting you to a scheduled BdREN Zoom meeting.

Topic: MAT 110- FINAL: TIPS AND TRICKS
Time: May 18, 2025 08:00 PM Astana, Dhaka

--> Join BdREN Zoom Meeting from Laptop or Mobile:
<https://bdren.zoom.us/j/2313081916?pwd=qdiZaZxXahPZ9k25qdyxs9lbolJ0I9.1&omn=95711536818>

Meeting ID: 231 308 1916
Password: savelife

=====

- **See previously shared MSG from Course Coordinator here again:**

=====

Syllabus for Final Exam:

- Partial derivatives
 - Chain rules for partial derivatives
 - Maxima and Minima of functions of two variables
 - Lagrange Multipliers to find maximum and minimum values
 - Taylor expansion (Linear and Quadratic) of functions of two variables
 - Conic sections (Parabola, ellipse and hyperbola)
 - Conversion of points (Rectangular, Cylindrical and Spherical Coordinates)
- Note:** Students will answer 5 questions out of 6 questions.Marks: 7*5=35
Exam Duration: 1 hr 20 min

=====

Discalimer: Just solve the practice problems and related examples or final. Because, as you've already seen **in the previously shared MSG from Course Coordinator:***These topics have been introduced in class or discussed but mentioned as **not to appear in final exam:***

- *Partial derivatives:*
Implicit Differtiation,
- *Chain rules for partial derivatives*
- *Maxima and Minima of functions of two variables:*
Absolute extrema (maxima/minima) and Optimization problems
- *Lagrange Multipliers to find maximum and minimum values :*
Optimization problems
- *Taylor expansion (Linear and Quadratic) of functions of two variables:*
3rd or higher degree approximation, 3 variable function.
- *Conic sections (Parabola, ellipse and hyperbola)*
- Conics in polar coordinates
- *Conversion of points (Rectangular, Cylindrical and Spherical Coordinates)*

Add comment

Sakal RoyMay 16, 2025

Dear All,
You do not need to show proof of the formulas. Just using them 100% correctly is sufficient for full marks. However, knowing tiny details about the formulas and a brief idea about working steps greatly helps avoid mistakes. **Intuition combined with observation works as a shield against common errors.**

https://bdren.zoom.us/rec/share/SdtzaGntnTgEJFrusMFFvXYKnzjZOb2nRkdYPwxaDWORoRJPJPFbhbM3Az9lowSj._9PR8qvvQmPzLB-j

BEST WISHES.

You've to answer 5 out of 6question.

The topics are all given by course coordinator earlier and posted in google classroom.

However, all topics are important. Its your choice to pick any 5. But don't miss basic of any part since you might face an easy question from a topic that you left. I'll take an exam review session and discuss tips and tricks there. See announcement in google classroom. Best wishes.

Dear All,
In case you haven't submit your assignment within the deadline, do submit it within **monday**.
Though that's in the late submission period, but I'll request your ST to consider that if you email me mentioning your reason for missing the extended deadline.
Take care. Best wishes.
See you all in next class, don't miss it.

1 class comment

MD RIAZUL ISLAM • Apr 26, 2025

Assalamualaikum sir,

I sincerely apologize for the delay , I just submitted it a few minutes ago.

Will it be counted as a late submission? :)

I kindly ask for your understanding this time, and I assure you that I will be more careful moving forward.

Add class comment...

Sakal Roy

Apr 24, 2025

Dear All,
Hope you are well.
I am unable to take todays class due to unfortunate reasons.
Sorry for the onconvenience.
See the resources.
I'll take additional online make up sessions later.
Thank you for understanding.

2 class comments

Sakal Roy • Apr 25, 2025

I'll discuss in class just to show applicaion of partial derivative and compare wth implicit differentiation. Just knowing the rule and seeing given example is enough, no further practice problem is suggested on that part.

Add class comment...

Sakal Roy

Apr 23, 2025

Dear students,
To finish PARTIAL DERIVATIVE and CHAIN RULE for PARTIAL DERIVATIVES once and for all:

- Start with watching the resources attached here.
- Then Read directly from **GOOGLE DOC** to understand selected parts from **HOWARD ANTON**.
- After you're confident practice **BRACU** suggested **practice sheet problems and excercises** from **GOOGE DOC**.
- GOOGLE DOC** also contains **more detailed resources** and **online solvers** to aid your preparation.

See you all in next class.
Best wishes.

FUN FACT:

WHO'LL EAT WHAT?

Apr 19, 2025

Dear All,
Announcements:

- No offline class or consultation will be from me on

- 21 APRIL, 2025 (MON).
- I'm announcing a 6 hour long - MEGA CONSULTATION HOUR ON:
22 APRIL, 2025 (TUES) from: 10:00AM - 1:00 PM and 2:00 PM-5:00 PM.

Instructions:

- First see my Recorded Class from MAT 110-sec 16 (1 hour 30 minutes).
- Then see the attached short videos (8 mins in total) to explore further, those will likely to be appear in your next assignments/presentation/groupwork/project for MAT 110. I'll announce them after you complete submission of your first assignment in due time. Hopefully that'll help you focusing one thing at a time.

BE SURE TO CLEAR ALL YOUR CONFUSION AND DON'T IGNORE ANY MATH EMERGENCY.
MAY THE BEAUTY AND JOY OF MATHEMATICS GUIDE YOU TO SUCCESS.
BEST WISHES.

Meeting Summary for MAT 110:

AI-generated content may be inaccurate or misleading. Always check for accuracy.

Apr 19, 2025 12:29 PM Astana, Dhaka ID: 231 308 1916

Quick recap
Sakal introduced the concept of partial derivatives and change rules, focusing on problem-solving and visualization, and explained the basics of functions with single and multiple variables. He also discussed the domain, codomain, and range of functions, and the behavior of these functions for specific inputs, including zero and negative numbers. Additionally, Sakal explained the concept of Cartesian product in mathematics, using a deck of cards as an example, and emphasized the importance of understanding domains and co-domains in functions.

Next steps

- Students to review the Google Classroom materials on coordinate systems and multi-dimensional visualization.
- Students to solve practice problems on partial derivatives using the provided calculators and solvers.
- Students to explore the 3D calculator for visualizing multi-variable functions.
- Students to complete the assignment on graphing multi-variable functions.
- Sakal to provide more detailed examples and practice problems in the next session.

Summary

Partial Derivatives and Function Basics

Sakal introduces the concept of partial derivatives and change rules, focusing on problem-solving and visualization. He explains the basics of functions with single and multiple variables, using examples to illustrate domains and codomains. The discussion covers the notation for functions, including input and output variables, and emphasizes the importance of clear understanding in mathematical modeling. Sakal also mentions that students will need to plot functions and create short videos as part of their assignments or group projects.

Functions in Mathematics: Domain, Codomain, Range

Sakal explains the concept of functions in mathematics, using countries and their capitals as examples. He clarifies that while the relationship between countries and capitals is a relation, it's not necessarily a function due to the one-to-one correspondence requirement. Sakal then discusses the domain, codomain, and range of functions, emphasizing that the range consists of actual outputs, which may be a subset of the codomain. He uses examples like Bangladesh, Nepal, and China to illustrate these concepts.

Domain and Range of Mathematical Functions

Sakal discusses the domain and range of various mathematical functions, focusing on real and complex numbers. He explains that for the function $f(x) = x^3$, the domain and range are all real numbers. For $f(x) = x^2$, the domain is all real numbers, but the range is limited to non-negative real numbers. Sakal also explores the behavior of these functions for specific inputs, including zero and negative numbers, and discusses the concept of infinity in relation to real numbers.

Multivariable Calculus: Understanding Domains and Co-Domains

Sakal discusses the methodology for dealing with negative Bose and introduces the concept of multivariable calculus. He explains the importance of understanding domains and co-domains in functions, emphasizing the need to clearly define input variables. Sakal demonstrates how to plot functions using visualization tools and calculators, encouraging students to practice writing functions with multiple input variables. He stresses the significance of recognizing independent variables and understanding the set of valid inputs in multivariable calculus.

Cartesian Product in Mathematics Example

Sakal explains the concept of Cartesian product in mathematics, using a deck of cards as an example. He describes

Apr 19, 2025 (Edited Apr 19, 2025)

Dear All,

You've already received email from BRACU regarding online class on 19th APRIL, 2025 (SAT).

So, here is the meeting join link:

(N:B: Also, there'll be No consultation for 19 April, 2025 (SAT) since it's not possible to take offline. However, I'll announce offline MEGA CONSULTATION HOUR later to compensate that. Email me your queries in the meantime .)

Sakal Roy is inviting you to a scheduled BdREN Zoom meeting.

Topic: MAT 110

Time: Apr 19, 2025 12:30 PM Astana, Dhaka

--> Join BdREN Zoom Meeting from Laptop or Mobile:
<https://bdren.zoom.us/j/2313081916?pwd=qdiZaZxXahPZ9k25qdyxs9lboJJOi9.1&omn=94073339053>

Meeting ID: 231 308 1916

Hello, everyone. Hope you are doing well.

I will start todays class officially at 20 minutes later.

Todays task is to:

#THINK ALL BY YOURSELF
(first 20 minutes on your own)

#THINK HARDER TOGETHER
(when class officially begins)

These first 20 minutes are for your self exploration regarding the following questins:

#How do human see?
#Do you think we can see 3D?

Write down your vote YES/NO here and write corresponding ideas, reasoning in a paper.Write your thought in detail. Take time, review your reasoning.
Include the following parts in your writeup for example:
Whats your logic behind your answer?
How do humans see and At what age did you learn that info?
Did you find any exception or confusion regarding that theory of seeing?
I'll listen to them while starting the class. See you all in class tomorrow.

Apr 12, 2025

Hello,

As you know BRACU anounced online class for today.

However, I wanted to demonstrate something in real life and discuss with you all. But that's not that much fruitul in online.

So, I won't take any class today. But, I am shaing the resources for next class beforehand. You'll also find them in course info Googledoc for SPRING 2025.
Feel free to go through them, explore and experiment.
In next class we'll enjoy the tale of real life and mathemaics together and get ready to apply those experiences later.
Also, no consultation for today, send me your query in email if necessaray. I'll respond there accordingly.
I wish to announce A day long consultation on next week to help you all preparing.
Best wishes.

Hello, everyone. Hope you are doing well.
Todays class consists of discussing the basic ideas needed to move forward.
Also we'll discuss what is multivariable calculus and selected topics from multivariable calculus for for MAT110 in this semester SPRING 2025.
Will listen to how your EID vacation went and get your opinion on the given movie/ movie clip.
Will also discuss about any query regarding the announced written assignment.

By this time, you all are supposed to receive an official announcement from BRACU in your individual bracu mail. Sharing here again for convenience. Before that read here a clarification from me besides official msg from BRACU.

My MSG for you:
Thanks for reaching out to me requesting tomorrows stance of soliderity with gaza.
As you've already noticed in the earlier announcement in the google classrooms of my sections (MAT 11

- Osec 16,19,20), there is no offline class from me on 7th April,2025 (MONDAY). But to make it clear, I announced it earlier so honestly speaking it is not linked with attack on Gaza. However, even though I announced for no class on 7th, I wanted to announce extra consultation hour. But appreciating your stances for humanity, I won't announce that on 7th anymore. Let's just hope that your collective stance will cease the war. Though its not anymore a war, its plain and simple genocide.
Regards
Sakal Roy
Adjunct (Contractual) Faculty,
MNS, BRACU

Official msg from BRACU:

Dear Students, Faculty, and Staff,

We are deeply concerned about the ongoing crisis in Palestine and stand in solidarity with those affected by these tragic events. Our thoughts and prayers are with all who are enduring suffering, and we support the universal call for peace, justice, and human dignity.

In support of this cause, we uphold our students’ right to express their solidarity in peaceful and meaningful ways. Therefore, no academic activities will take place tomorrow; students at RS will receive specific guidance from RS management.

We are with you during this challenging time. Following tomorrow, all academic activities will resume as scheduled, since we are mindful of the need to avoid losing any valuable teaching time.

Thank you for your understanding and commitment to our community values during these difficult times.

Regards

Office of the Registrar
BRAC University

Hello, hope you’re all enjoying your vacation.
I promised 3 things to you earlier:

- ✔ Movie Day! – we’ll watch movie in the first classes after Eid.
 - ✔ No new topics in the first week – We’ll focus on self-reflection and self-assessment of midterm topics.
 - ✔ Assignment flexibility – You can use books, online resources, even ChatGPT (with proper reference), but no human help to avoid violating BRACU plagiarism policy.
- So, lets see what I can do to keep my promises.

🔥 **Movie Assignment – Watch 2 movies (clips attached for reference).**

Then Think about:
→ What’s the connection between this course and these movies?
→ Share your thoughts in our next in-person class at BRACU.

🔥 **Midterm Topics Assignment – See attached.**

Announcement on next week’s Class Schedule:

🎬 **Movie Day (No Regular Class! No Online/Offline Class! Watch movie at home,that's the first part of the movie assignment):**

Sec-16: April 5, 2025 (Sat)

Its in the first part of the assignment.

➤

Sakal Roy
Mar 27, 2025

⋮

Hello, everyone.
Hope you're doing fine.
There'll be no class from me before EID-UL-FITR.
So, now, I've 3 important news to share:

1) I'll announce an online assignment on MID TERM TOPICS. You'll have 2 weeks(14 days) to submit it. But no need to worry about that now.
I'll announce it after EID VACATION ends.

2) We'll continue our unfinished Team Quiz in the first week after EID. And I'm thinking of planning some sort of celebration (not only for the winning team but also the whole class). So, get ready for a convenient mathematical planing for that too.

3) Enjoy the EID FESTIVAL with your family and friends. Be ready to share your experiences.

EID MUBARAK IN ADVANCE.
Stay safe, take care.
Best wishes.

4 URGENT ANNOUNCEMENTS:

1) Regarding Topics for MID TERM (confirmed from Course Coordinator):

Limit and Continuity,

Differentiability,

Techiques of Differentiation,

Rolle's and Mean value theorem,

Maxima-minima

Taylor and Maclaurin series/polynomial

That means:

1) **Succesive Differentiation and LEIBNITZ theorem** will not be included in MID TERM EXAM this semester.

2) In maxima-minima you jusst need to know how to find extrema(maxima-minima), increasing-decreasing interval,concave up-down interval. You don't need to take prepaaraion for **OPTIMIZATION PROBLEMS or REAL LIFE SCENARIO** parts from there for MID-TERM EXAM.

But, remember they'll be needed in FINAL EXAM TOPICS and also in your next courses. So, I'll obviously

Resources to look at for Differentiability and Techniques of differentiation.
There's more in the google doc. But these is the least that you have to go through to solve the practice problems.
Best wishes.

3.1 Derivative as slope

YouTube video • 7 minutes

3.2 Computing a derivative...

YouTube video • 2 minutes

Offline in BRACU, MNS 4th floor is usual consultation olace. But you can also email your problems in email if you can't come, I'll respond accordingly. Though those who meet me offline during mega consultation hour will get priority. Hope that helps.

Mar 8, 2025

Announcement:

This week, I want to take an extra online problem solving session on limit, continuity and differentiability to wrap up thes topics once and for all. The session will be held on zoom and recording will be provided to you all.

So, please comment in this post regarding your favourable date and time for that extra online session. I'll try to decide based on majoritys opinion.

These topics are the only place where you need to use limit and use it carefully. For the rest of the topics for mid limit is not needed. Those are easier than limit solving cause they're most mostly focused on using directly the techniques of differentiation.

Remember, we've to make sure that everyone, I repeat everyone is clear about the practise problems in these topics. So, cooperate accordingly.

Best wishes.

Reminder:

As announced in last class,

Todays class will start with a short team quiz from the contents that we've already learned together.

The first 15 minutes is for you all to form 2 teams by yourself and finalize two team name, playing strategies between your teams.

Then I'll start the class officially directly since I've already discussed the team quiz rules.

Team Quiz Rules:

1) There'll be total 5 qustions for each team.

Questions may include MCQ ques, explanation, error finding, mathematical debate etc.

2) Team members can discuss the answer for 2 minutes within themselves after the question is revealed. But no resources except your reasoning are allowed during Team Quiz time.

3) Then in each round I'll chose 1 person from each teams randomly place to come to the white board and answer/explain, debate the answer/explanation of that rounds question.ami

Get ready. See the resources now. Let your sectionmates know about this in case they are not in this google classroom.

I'll start the Team Quiz at sharp 12:00 PM.

Let your sectionmates know.

Feb 26, 2025

Dear ALL,
I'm assigning tomorrow feb 27, 2025 (THU) days class as SELF-STUDY since after last class we all just need to go through the resources from "BEFORE CALCULUS" part on our own. Specially focus on absolute value function and solving inequality.

This means no class from me on Thursday, 27 feb, 2025 (THU) to attend.

You can email me your query and confusion while going through the resources.
We'll complete limit and continuity both on the next week. So, get ready with a strong foundation.
We'll have an assignment after next week based on fundamental mathematical ideas and some elementary challenges.

https://classroom.google.com/u/8/c/NzU0NDYzMdYwNzAw

?

16/17

I'll try to announce any quiz with 1 week time in hand and any assignment from me will have at least 2 weeks time.
Best wishes.
