Dear All,

- As promised MID AND FINAL RESULT ANALYSIS_MAT110_SUMMER_2025 has been sent to everyone's individual mails. Hope that helps you in future to analyze your strength and weakness and improve.
- For future use I'm sharing here the teaching-learning material's I've curated till now during the courses I taught. Hope you can make good use of it.

MAY THE BEAUTY OF MATHEMATICS ILLUMINATES YOUR LIFE.

=====

=====

MULTIVARIABLE CALCULUS TEACHING -LEARNING RESOURCES (MAT 110+MAT 120)+ TOPICS IN COMBINATORICS(MAT 456)//Curated by SAKAL ROY//FIN: SKY

Dear All,

Here are all teaching-learning material curated by me in MNS, BRACU till date for everyone's' convenience. All of these are updated till the last semester I taught these courses. So it's subject to change in next semesters based on the decision of corresponding honourable Course coordinators. Therefore, please consider these just as a further resource for teaching-learning. And in case of any confusion please consider the respective course coordinator's decision as final.

I'm greatly indebted to my colleagues, my students for their continuous support through their constructive criticism and discussion sessions in and outside classroom and sometimes even outside the university.

Heartiest thanks to MNS, BRACU for providing a fresh air for healthy academic debate and discussion.

And, It'll be my utmost pleasure if you send me your invaluable feedbacks at: ext.sakal.roy@bracu.ac.bd

I'll try to accommodate them as much as I can and develop these materials further.

Sakal Roy

Sep 23, 2025 (Edited Sep 23, 2025)

I tried to ensured that no one misses next grade for 2 marks. SO what you're seeing is already rounded as much as I can, no further increase is possible from my end. Check for any discrepancy only.
see updated one here. last version deleted.
Best wishes.

@everyone

2 notes for you all for your future academic journey.

1) Even if I mentioned many times in class and exam review sessions, some of you has answered more than 5 questions in MID and in FINAL EXAM. And as I said earlier my system as usual practice directly discarded the last one. In some cases you've got more marks in last problem and discarding that directly affects your grade.
Don't do that again in any future academic exam, read the instruction of the question carefully and abide by it. Otherwise, not everytime there'll be scope for manual adjustment.
However, I am checking again manually now to make sure that those who answered more than 5 ques get the best 5.
It's taking more time than I expected. Will send everything after checking all such cases to avoid unfortunate reduction in your marks.
2)

In each problems in MID and FINAL the fractional marks are already being rounded up in my system up to 1 decimal places so allowing a probable increase in general.
Even after that, In case anyone misses next grade for 1 marks (which is equivalent to 1.5 marks jump due to rounding in BRACU system), I'll add that as BONUS.

But anything more than that can't be adjusted anymore by me to maintain the integrity of assessment.

Thanks in advance for your understanding and patience.
Best wishes.

@everyone

Announcement:

1. Marks breakdown(A,B,C) in each problem and total marks of MID and FINAL will be sent to everyones email individually on: **around 1:00 pm, tomorrow 23 sept, 2025 (TUESDAY).**

2. Complete Gradesheet of everyone containing quiz, assignment, mid, final and total marks and grade will be directly uploaded here on:
around 2:00 pm, tomorrow 23sept, 2025 (TUESDAY).

3. Inform me regarding anything related to gradesheet:

For your convenience and based on some of your requests I'm announcing FINAL (and MID) **Script checking day_slot 2:**
Monday, 22 sept, 2025 : (10:00 am

- 5:00 pm)**
*you can come today in **slot 1:**
(Snday, 21 sept, 2025: 10:00 am -5:00 pm) also as announced.
However, I'm still working on inputting marks of everything: quiz, assignment, mid, makeup mid, final. So, I can send everything in individual mail after Monday, 22 sept, 2025 : 7:00 pm.
1. So, in slot 1, I'll focus on individual discussion regarding assessment of your scripts as much as I can and won't be able to calculate all the fractional partial marks.
2. In slot 2, hopefully I'll be able to input everything and be ready to show and send you all the individual marks.
So, meet me in the slot that suits best for you.
Thanks in advance for your patience and cooperation.
Best wishes.

@everyone
FINAL SCRIPT CHECKING TIME:
Date: September 21, 2025 (Sunday)
Time: 10:00am – 5:00pm
MID SCRIPTS: *You can see your MID scripts also in the same date and time if you haven't.
ASSIGNMENT INFO:
***Submit Assignment_1 in google form if you haven't already.**
***Submit Assignment_2 within 11:59 pm, 21 September, 2025 (Sunday)**
: Just Commenting in the assignment_2 post given earlier

in Google Classroom/Slack. Don't comment here or submit me anything in email for Assignment_2.
QUIZ:
***Those who have attended Group Quiz (mathematical debate) will get full marks in Quiz.**
***Those who haven't attend the Group Quiz Email in my official mail with the followings within 11:59 pm, 21 September, 2025 (Sunday):**1. Name:
2. Student ID:
3. Reason of absence in Group Quiz:
4. PDF attachment containing Solution of all the Mini Assignment Questions I've posted in this semester in Group Communication medium (Google Classroom/Slack).

IT WAS A NICE EXPERIENCE WITH YOU ALL.
TAKE CARE. BEST WISHES.

Aug 28, 2025 (Edited Aug 28, 2025)

@everyone:

I'll start the class discussion on partial derivatives an chain rule after 20 minutes later.
In this 20 minutes you've an assignment to solve individually.
Find the natural domain and range of the following multivariable function and comment on their geometrical interpretation (i.e. what kind of curve, surface or geometric object it will show visually once plotted)
 $f(x,y,z) = \ln(x^2+y^2- n \cdot z^2) - \ln(x+y-n \cdot z)$

- where n is the last digit of your student ID.

You're allowed to use any resources available and e even allowed to discuss in groups but make your own argument and write it down.
See you all in class.

Add comment

Sakal Roy

Aug 21, 2025

@everyone:

I'll start the class 15 minutes later.
In this 15 minutes recall what we've learnt in last classes and write down 5 points individually regarding Multivariable funtions.
Todays discussion will be the last one regarding basic understanding and vsualization of multivariable functions. Today we'll also learn visually what partial derivatives are so that we can solve partial derivatives practice sheet problem easily.
See you all in class.

2 class comments

Sakal Roy

Aug 21, 2025

On my way. Got stuck in rain. sorry for the inconveniences. If you're done writing 5 questions regarding multivariable functions watch this one and guess what happens. Harry potter fans don't give spoilers, let other try 🤔

2) COURSE COORDINATOR'S MSG REGARDING FINAL EXAM TOPICS:
=====

Dear Colleagues,
We are going to cover the following syllabus for the final exam of Summer 2025.

Syllabus for Final Exam:

- Partial derivatives
- Chain rules for partial derivatives
- Maxima and Minima of functions of two variables
- Lagrange Multipliers to find maximum and minimum values
- Taylor expansion (Linear and Quadratic) of functions of two variables
- Conic sections (Parabola, ellipse and hyperbola)
- Conversion of points (Rectangular, Cylindrical and Spherical Coordinates)

MAT110_SUMMER_2025_SKY 17

You can use the following link to generate a solution by inputting any $f(x)$ and any interval.
(This way you can check whether your solution is 100% correct) :<https://www.emathhelp.net/calculators/calculus-1/mean-value-theorem-calculator/>

You'll get 'Rolle's theorem' if you put $f(a)=f(b)$ in the 'Mean value theorem'.

Taylor and Maclaurin polynomials and Series for single variable functions:*READ AND PRACTICE: GOOGLE DOC*: Course Info: MAT_110_SKY_SUMMER_2025
Use this online solver to check your solution:<https://www.emathhelp.net/calculators/calculus-1/taylor-and-maclaurin-series-calculator/>

Tips for Exam:

Study the formula and procedure of finding the 'Taylor Polynomial' First.

You'll get 'Taylor Series' by just add a (+...) after the 'Taylor Polynomial' (It's just to indicate that it doesn't stop like the Taylor Polynomial).

You'll get 'Maclaurin Polynomial' if you put $x_0=0$ in the 'Taylor Polynomial'. (Maclaurin Polynomial is just Taylor Polynomial about $x=0$)

You'll get 'Maclaurin Series' by adding a (+...) after the 'Maclaurin Polynomial' (It's just to indicate that it doesn't stop like the Maclaurin Polynomial).

You'll get Linear Approximation if you take 1st 2 terms of Taylor Polynomial [that means finding $p_1(x)=f(x_0)+f'(x_0).(x-x_0)$].

The MEAN Value Theorem i...

Jul 24, 2025

@everyone

See you all in class tomorrow 24 July, 2025 (THU).

Topics:
Rolles and Mean Value theorem: (20 minutes)Basics discussed in todays make up class, only problem solving wille done tomorrow.
Maxima-minima: (30 minutes)
Basics discussed in todays make up class. 1st and 2nd derivative tests are same as you've read in HSC/grade 11-12. We need to clear confusion regarding the terms : increasing, decreasing, concave up, concave down, critical point.
Taylor and Maclaurin seires and polynomial: (30 minutes)
Easy if you can do two things:
`i) Differentiate a function n-th times successively.
ii) Find the n-th derivative at any point $x=a$
iii) Input values of $f'(a)$, $f''(a)$, $f'''(a)$ etc in Taylors polynomial formula.

EXTRA CONSULTATION HOUR:
TOMORROW, 24 JULY, 2025(THU) : 2:00 PM-3:00 PM and 5:00 PM - 6:00 PM

Watch todays Make up Class recording (no attendance for today, pay attention to the recording that'll be all):

MAKE UP CLASS:
Sakal Roy is inviting you to a scheduled BdREN Zoom meeting.

Topic: MAT110
Time: Jul 23, 2025 07:30 PM Astana, Dhaka

--> Join BdREN Zoom Meeting from Laptop or Mobile:
<https://bdren.zoom.us/j/2313081916?pwd=qdiZaZxXahPZ9k25qdyxs9IbolJ0I9.1&omn=95590953498>

Meeting ID: 231 308 1916
Password: savelife
We'll discuss:
a) Any problem related to limit, contiuity, differentiability (45 minutes):Special focus on Squeeze theorem relate problems as the last fronties and Just a brief Idea of asymptotes.
Comment here about the problems you faced difficulties, or send me in email.
b) Techniques of Differentiation and Successive Differentiation (45 minutes):
Techniques of differentiation is nothin new, its the same differentiation techniques you know from HSC/grade 11-12. Yet, we'll recap so that everyone clears their confusions once and for all.

MAT110_SUMMER_2025_SKY 17

Successive Differentiaon parts doesn't include Leibnitz theorem related problems. I've given solution of all the problems in this topic in Course info google doc. Yet, there are some tips and tricks for answering in exam, will show them to all of you for better understanding.

- Do you know how to find $f(x)$ and $f'(x)$ given the value of x and $f'(x)$?
- ii) Do you know how to find slope of AB given the coordinates of A and B?
- iii) Do you know how to solve quadratic equation $ax^2+bx+c=0$ given a, b and c?

The class will be recorded and recordings will be given as soon as its available.
Also, no attendance will be taken for make up class. Yet, I'd request not to miss the live discussion.
Best wishes.

Jul 20, 2025 (Edited Jul 20, 2025)

@everyone

- COURSE RESOURCES UPDATED FOR MAT110_SUMMER_2025.**
Yellow marked parts are not for this semester, use following one to get all in one place for my sections: **04, 17, 20.**

MAT110_SUMMER_2025_SKY
To share this document to anyone- USE the following link:
<https://rb.gy/jgt3q6>
or https://docs.google.com/document/d/1f8rNUeZVpRqr5wGd8j3p3Vsv6Y4_idHHVVasZ2_DCl0/

- MEGA CONSULTATION HOUR:**
You'll not get any official consultation hour before MID-TERM since you've elected both slots in SATURDAY.

So, for convenience I'm announcing a **MEGA CONSULTATION HOUR** on:
Today , 20 JULY, 2024 from 9:30 AM- 12:30 PM and 2:00 PM-5:00 PM
Best wishes.

ANNOUNCEMENT: CONSULTATION HOUR_SKY_SUMMER_2025:
Based on the given vote on the poll of my 3 sections: sec 04, 17, 20, the following 2 slots has been selected as consultation hour.
(a) SAT: 9:30 am - 11:00 am (got 14 vote)
(b) SAT: 2:00 pm- 3:30 pm

(got 18 vote)
Thank you for expressing your opinion by participating in the voting.

a) SAT: 9:30 am - 11:00 am:1+1+10+2=14
b) SAT: 2:00 pm- 3:30 pm:1+1+1+1+3+11=18
c) SAT: 5:00 pm - 6:30 pm:0+0=0
d) THU: 9:30 am - 11:00 am:1+5+2=8
e) THU: 2:00 pm- 3:30 pm:1+1=2
f) THU: 5:00 pm - 6:30 pm:0+0=0
g) propose any other day and time slot:
any other day 11:00am+Sun/Tues:Anytime
+Sun/Tue(After 11am)
